

...and if you want to wake up in the morning to music from your stereo:

HCM200D
Room temperature adjustable to meet your every requirement

- Energy-saving
- Controls up to 16 zones
- Central unit for home automation

The HCM200D can be equipped to manage all your household technics at any time without great expense.

In addition to switching your stereo on and off, it can activate and control many functions automatically:

- Simulate that someone is home
- Turn off gas and water pipes
- Remote access via mobile or telephone to check status and change settings (e.g. change room temperature)
- Move shutters, awnings and blinds up and down
- Control lights
- Turn household devices on and off

In addition to increased comfort and energy savings, the security of your property is increased, thanks to surveillance with the HCM200D.

LIVE AND WORK IN COMFORT

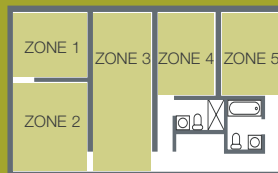

Room temperature adjustable to meet your every requirement

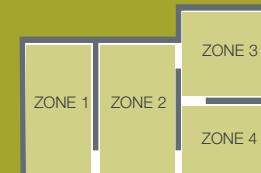

HR80

Private flats, houses and apartment blocks

Commercial / public buildings

Try it yourself

With the HCM200D, you can control room temperature in up to 16 different zones.

The intelligent room control system significantly increases your comfort, as well as reducing your energy costs by up to 20%. Using the HCM200D also gives you the opportunity of upgrading an already existing CM Zone zone control system to a Home Automation System with ease.

The central unit can be installed simply, quickly and cleanly without damaging the wall. Thanks to the individual time program, only rooms that are occupied are heated.

The HCM200D also supports optimisation and savings functions that can be adjusted individually.

HCM200D

Intelligent control for the private and business sectors

In the private sector e.g. flats, family houses and apartment blocks, in the business sector e.g. small offices, practices and retail outlets, and in the public sector e.g. kindergartens.

Do you already have a CM Zone System?

Each CM67z unit controls two zones independently of one another and can be equipped with the HCM200D any time to be able to control up to 16 zones.

With the HCM200D, you can control room temperatures individually in accordance with their usage. Up to 16 zones (rooms) can be controlled.
